Title: Sales Performance Analysis

Objective:

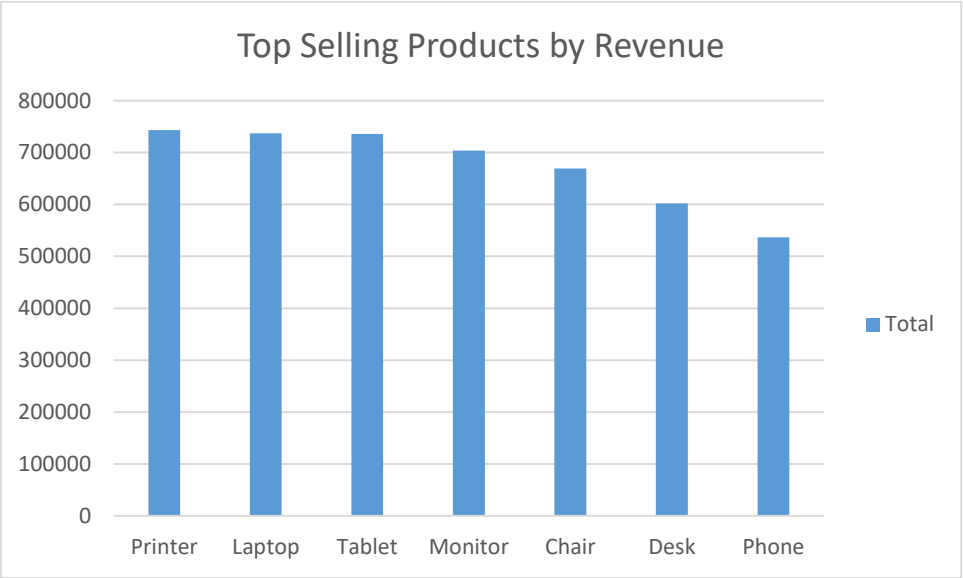
To analyze sales data and identify trends, top products, and regional performance.

Data Overview:

The dataset contains Date, Product, Region, Quantity, and Revenue.

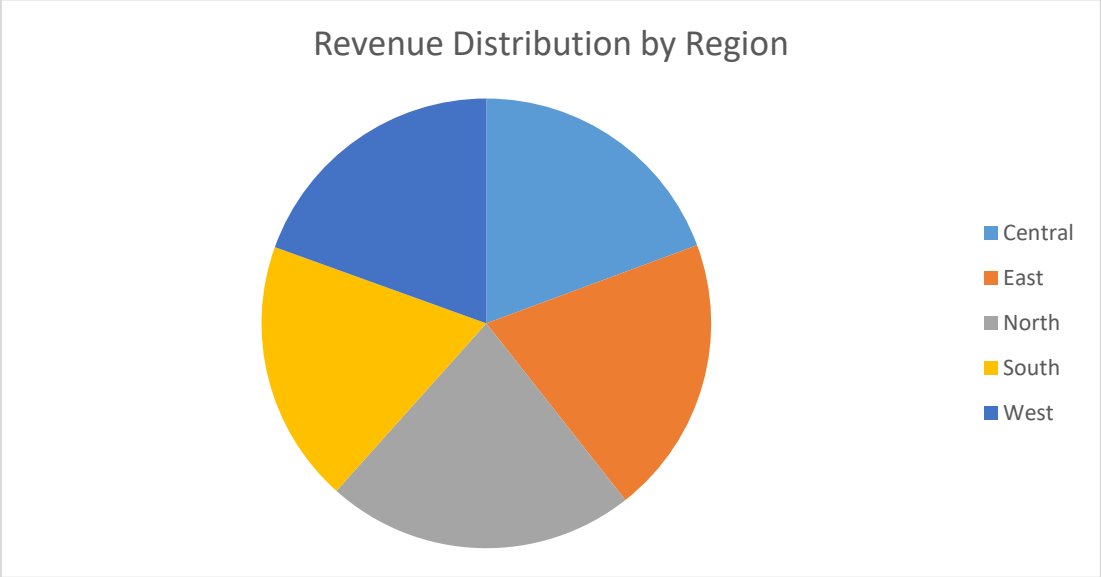
Analysis:

1. Product Analysis:



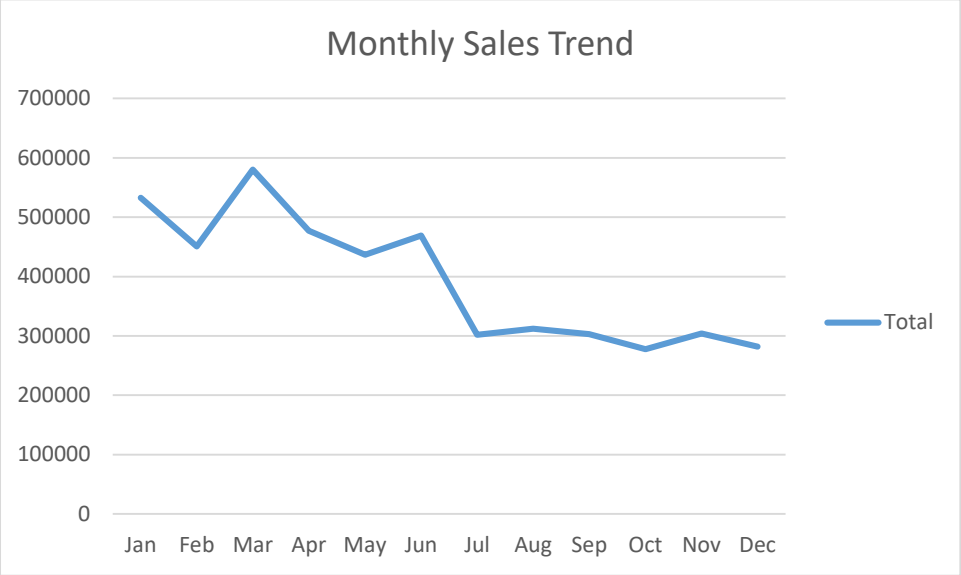
Top-selling products were identified based on revenue analysis.

2. Region Analysis:



Revenue distribution across regions is analyzed.

3. Monthly Trend:



Monthly sales trends were identified using time-based analysis.

Insights:

• Printer generates the highest revenue.

• West region contributes the highest revenue.

• Sales vary across months showing seasonal trends.

Conclusion:

This analysis helps in understanding sales performance and improving business decisions.
